Re: Frontier Communications of the Carolinas, Inc. Petition Requesting the Commission's Intervention in Numbering Resources Determinations – Myrtle Beach Rate Center

Dear Ms. Boyd:

Frontier Communications of the Carolinas, Inc. ("Frontier") requests a state waiver from the Public Service Commission of South Carolina to grant assignment of their request to the North American Numbering Plan Administrator (NANPA) for additional resources in the Myrtle Beach rate center.

The Frontier Number Planning Group has determined there are no clean number blocks available in Myrtle Beach, South Carolina. A new thousand number block, in which Frontier will be the "Code-Holder", is needed to satisfy a Location Routing Number (LRN) request for a new Genband G6 voice gateway installation in the Myrtle Beach rate center. The new trunk gateway will allow next-generation Voice over Internet Protocol (VOIP) services to be offered in South Carolina. The new LRN assignment will be used to support Local Number Portability functionally in LATA 432 to allow a customer's existing telephone numbers to be ported to the new VOIP softswitch platform.

To qualify for an additional NXX in the Myrtle Beach rate center, Frontier must meet Months to Exhaust (MTE) and utilization requirements as established by the FCC and as stated in ATIS' Central Office Code Assignment Guidelines (COCAG). Per section 4.3.1 of the COCAG, the MTE and utilization requirements state a service provider must be 75% utilized in current numbering resources for the rate center and "demonstrate that existing codes for the rate center will exhaust within 6 months".

Frontier submitted a request to NANPA, attachment A, on August 1, 2012 for the assignment of 1,000 NXX DID's in the Myrtle Beach rate center and was subsequently denied on August 1, 2012 due to the required MTE and utilization levels (see NANPA's Part 3 confirmation for denial of resources, attachment B). Frontier demonstrated a 35.972% utilization level of current codes in the Myrtle Beach rate center with no anticipation of exhausting the remaining numbering inventory for Myrtle Beach in the next 6 months (see MTE jeopardy analysis worksheets, attachment C, for utilization and exhaust calculations).

To accommodate the new Genband G6 voice gateway installation, Frontier is requesting the Public Service Commission of South Carolina to grant a state waiver for their numbering request in the Myrtle Beach rate center.

Please do not hesitate to contact my office at 803-250-9411 with any questions or concerns regarding this matter.

Sincerely,

A handwritten signature in black ink that reads "Afton Ellison". The signature is written in a cursive, flowing style.

If needed for an LRN, a CO Code Application needs to also be submitted to the PA. The Service Provider should supply the Numbering Plan Area (NPA); the Local Access Transport Area (LATA), which is a three-digit number that can be found in the Telcordia™ LERG™ Routing Guide. The Operating Company Number (OCN) assigned to the service provider and the OCN its parent company. An OCN is a four-character alphanumeric assigned by Telcordia™ Routing Administration (TRA). In addition, the number of thousands-blocks requested should be supplied. The Switch Identification as well as the city or wire center name, rate center, rate center sub zone, homing tandem and CLLI™ tandem of the facilities based provider<sup>xi</sup>. Explanations of these terms may be found in the footnotes.

Section 1.3 The date the Service Provider completes the application should be entered in this section, as well as the Effective Date of the requested thousands-block.

Section 1.4 Service Providers should indicate their type, e.g., local exchange carrier, competitive local exchange carrier, interexchange carrier, CMRS. They also indicate the primary type of business in which the numbering resource is to be used. Service Providers also may indicate their preference for a particular thousands-block, e.g., 321-9XXX, or indicate any thousands-blocks that may be undesirable, e.g., 321-6XXX.

Section 1.5 Service Providers indicate the type of request. Initial requests are for first applications for thousands-blocks in a rate center, growth for additional thousands-blocks in a rate center in which the applicant already has numbering resources, and provide the required evidence as ordered by the FCC.

Section 1.6 Service Providers must indicate the updated/current information in regards to contaminated TNs on the block they are returning to the pool. Blocks with over 10% contamination (101 TNs or more) shall not be returned to the pool unless they meet criteria outlined in section 9.1.2 of these Guidelines. If the block being returned is over 10% contaminated the PA shall seek a new block holder. If question c and/or d have a response of No, the request for return shall be denied.
